I don't DO thirds. Don't know anyone who does.  
 All substitutions are close, but may not be exact.  
 Got fed up with GAM book and had to go to their site;  
     Still didn't find some colors, so had to go back to the book,  
     and look at the sub-titles of each color.  
 I prefer it when like colors are next to each other.  
 Apollo's numbers make the most sense.
