LEKOLITE® SPOTLIGHT

2341/42 STRAND CENTURY

6" x 6" (152 mm x 152 mm) 500W/750W

Die-cast, high efficiency and precise beam control.

A versatile spotlight for theatre, television and high intensity architectural accent lighting.

- Compact design, precision die-cast aluminum construction for perfect fitting of components with accurate operating control of moveable parts.
- Four push shutters and pattern holder slot for precision beam control - or iris with 2342.
- Flatted ellipsoidal specular Alzak reflector engineered for maximum efficiency.
- Choice of various single ended tungsten-halogen or conventional incandescent lamps.
- Two spring loaded latches for quick relamping. easy maintenance - one to release burner body for relamping, the second to release rear body for access to internal components.

Cat. No.	Lenses
2341	1 - 6" x 6" (152 mm x 152 mm) stepped lens with four push shutters
2342	1 - 6" x 6" (152 mm x 152 mm) stepped lens with iris
	Accessories
1108	Color or diffuser frame
1335	High Hat
1342	Pattern Holder
1352	Set of 6 patterns
1413	Stripped glass color filter (specify color)
1540	15" (381 mm) Sidearm with clamp and sliding tee
1541	24" (610 mm) Sidearm with 2 pc. clamp and sliding tee

Strand Century Lekolite® Spotlight

6" x 6" (152mm x 152mm) 500W/750W

Specifications

This unit shall be a 500W/750W ellipsoidal reflector spotlight with a medium prefocus socket to accommodate a tungsten-halogen or conventional incandescent lamp, a flatted ellipsoidal specular Alzak processed aluminum reflector, four push shutters and a template slot, all mounted within a die-cast aluminum housing.

The single 6° x 6° (152 mm x 152 mm) stepped lens shall be mounted in a die-cast aluminum lens tube designed to provide for sharp or soft definition of the beam without opening a slot for passage of stray light rays or allowing extraneous internal reflections from the lens tube. This tube shall be fitted with heavy duty color frame holders.

Conveniently located spring loaded latches shall permit ready removal of the burner housing for relamping or opening of the central body of the unit for cleaning.

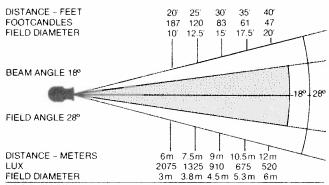

The shutters and gate assembly shall be of special heat resisting alloys. Adequate ventilation shall be provided in the form of openings in the body completely surrounding the reflector, the lens tube and between the burner and reflector housing. Further reduction of the temperature shall be accomplished through the use of a finned heat sink around the lamp receptacle burner body.

Each unit shall be supplied with a malleable iron clamp to grip up to 2" (51 mm) pipe, a die-cast aluminum yoke with locking handles and 3" (0.9 m) asbestos leads. Exterior finish shall be baked enamel and the entire unit shall be U.L. listed and CSA approved in Canada. Weight: 13 lbs. (5.9 kg.)

This unit shall have an 18° beam angle and a 28° field angle and shall produce 83 footcandles at 30' (910 lux at 9 m) maximum using an EGF lamp.

NOTE: To specify unit with iris, use 2342.
