

CONTROLBOOTH.COM

About ControlBooth

ControlBooth has been operating since January 2003. It was started with intent to become a resource for people who are new to the industry. CB has evolved over the years from a small set of articles, to a full fledged online community with a dedicated group of members from all areas of the entertainment technology industry.

Today, ControlBooth consists of a large community of over 21,000 professionals and students. Over 1,000 new members are making the decision to join ControlBooth's Community every year.
